Full-time Professorial Faculty Composition (\%): JHU and Peer Groups Fall 2021 ..... 25

## I. Background

Johns Hopkins remains deeply committed to the dignity of and equity for all persons. Fostering an academic environment with a rich diversity of people, backgrounds, experiences, and thought is central to our mission of education, research, and service, as well as our commitment to freedom of inquiry and expression. The Roadmap on Diversity and Inclusion, first released in the spring of 2016, acknowledges that effort to recruit and retain a diverse faculty body is a key facet of our vision. In order to track progress and remain accountable to the Johns Hopkins community, three Faculty Composition Reports, guided by the vision expressed in the Roadmap, were published over the intervening years.

Beginning in the summer of 2020, with the input of working groups and the Roadmap Task Force, the Roadmap was reassessed and revitalized, culminating in the publication of The Second JHU Roadmap on Diversity, Equity, and Inclusion in fall 2021. This evaluation and renewal of the Roadmap have served to recommit Hopkins to DEI principles and have also motivated methodology changes in the analysis of the most recent faculty composition data collected in fall 2021. For purposes of this report, those changes are: the use of federally mandated race/ethnic identity categories, the use of the term "underrepresented group (URG)" as a collective measure of diversity, and the fractional allocation of joint appointments, such as the Bloomberg Distinguished Professors, that span departments. These changes better align JHU's internal assessment of faculty composition with required federal reporting and improve our ability to benchmark against peers' diversity data.

As an institution JHU recognizes that there are a variety of facets of individual identity that contribute to the diversity of our faculty. While our commitment to diversity encompasses all facets of identity, our ability to quantitatively assess diversity metrics is limited to the demographic data collected in our HR system. As such, in this analysis we report on faculty composition by gender, race/ethnic identity, and residency status. We firmly believe that this detailed data will advance our efforts to measure our progress in faculty diversity over time, better assess our opportunities for growth, and be more strategic about faculty recruitment, advancement, and retention.

In addition to the methodological changes that have been incorporated in the current report, the Second Roadmap calls for a broadening of the composition reports to be more reflective of various dimensions of diversity-beyond race/ethnicity and sex-represented on our campus. We plan to work with constituent groups to determine which categories of information to collect and incorporate in future reports. This more granular information landscape will better inform our efforts to measure our progress in faculty diversity. Some of the categories that have been discussed with different constituent groups include ability status, religious diversity, gender identity and representation, and veteran/military status. We also plan to reassess the language describing these categories to reflect more accurate and nuanced understandings of identity. We understand that broadening our reporting in this way will require a great deal of additional sensitivity, including developing strategies for anonymous self-identification of groups and identities via periodic climate surveys with data collection protocols evolving and tracking progress at the leadership and managerial levels.

## Report Highlights

Since 2020, we have continued to press forward, making meaningful progress on our faculty diversity efforts and embedding these values in the Second Roadmap on Diversity, Equity, and Inclusion. This report's key findings include:

- Between the censuses of fall 2015 and fall 2021, representation of women and faculty in Underrepresented Groups (URGs) ${ }^{1}$ has increased. Representation of women faculty has increased by 4.3 percentage points, while that of URG members has increased by 3.2 percentage points.
- In that six-year period, the proportion of women faculty has increased from $42.0 \%$ to $46.3 \%$. Among professorial faculty, the proportion of women has increased from $37.4 \%$ to $41.7 \%$ an increase of 4.3 percentage points.
- During the last four years, women's professorial faculty representation has increased by 3.2 percentage points. This is commensurate with increases among our lvy Plus and AAU peers. ${ }^{2}$
- During the 2015-21 six-year period, the proportion of faculty in Underrepresented Groups has increased from $8 \%$ to $11.2 \%$. Among professorial faculty, the proportion of faculty in URGs has increased from $7.8 \%$ to $10.7 \%$.
- Increases in representation of Hispanic/Latino and Black professorial faculty at Hopkins have kept pace—or have slightly outpaced-increases among our Ivy Plus and AAU peers.

## II. Report Nomenclature

## Terminology and Descriptions Used

The goal of this report is to provide accurate data about JHU's faculty composition to assist in identifying areas for improvement and tracking progress. It details composition data regarding gender and race/ethnic identity, sourced from JHU's HR system. By necessity, this report also includes aggregated measures of diversity, fully recognizing that these measures are inherently limited in many ways and do not do justice to the salience of individual experiences.

## Gender Composition

Within JHU's HR system, gender is treated as a binary variable with the option for faculty to identify as female or male. As such we do not have data to account for faculty who do not identify within a gender binary. However, every faculty member is accounted for in the faculty count. Faculty members who decline to identify as either female or male are apportioned within each division based on the known proportion of faculty who identified as female or male. ${ }^{3}$

[^0]Additionally, the terminology of female and male aligns more accurately with the definition of sex than the definition of gender. As such, within this report, we use the terms "women" and "men" with the acknowledgment that these labels do not necessarily describe the experience of gender by each individual faculty member.

## Measures of Residency

Faculty who are not citizens or nationals of the United States and who are in this country on a visa or temporary basis are referred to as International (Int'l) faculty in this report. This category does not include faculty who have obtained U.S. permanent residency.

## Measures of Ethnic and Racial Identity

In accordance with federally mandated reporting guidelines, JHU employees self-select both their ethnic identity—defined as a binary, Hispanic/Latino or Not Hispanic/Latino-and their racial identity from one or more of the following five categories; Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian or Other Pacific Islander, and White. Faculty who are nonHispanic and identify with two or more racial identities are counted as Two or More Races.

We employ one collective measure of diversity: belonging to an Underrepresented Group, or URG. A faculty member belongs to a URG if they-regardless of residency status-identify with one or more of the descriptions Hispanic/Latino, Black or African American, American Indian or Alaska Native, or Native Hawaiian or Other Pacific Islander. ${ }^{4}$ Therefore, an equivalent definition of URG identity is anyone non-Hispanic/Latino who also does not identify as only white; only Asian; only white and Asian.

The use of the term "underrepresented groups" (URG) is aligned with JHU's Second Roadmap on Diversity and our recommitment to inclusive language; in the context of this report, it reflects specificity and accuracy in naming which groups are underrepresented within our faculty body.

## Joint Appointments

In this report, the joint appointments of Bloomberg Distinguished Professors (BDPs) are allocated across departments and divisions as fractional amounts per contract. Additionally, Biomedical Engineering (BME) and Environmental Health and Engineering (EHE) faculty members are each counted only within their primary-appointed department.

The use of federally mandated race/ethnic identity categories in this report, the use of term URG as a collective measure of diversity, and the fractional allocation of joint appointments are substantial changes relative to the methodology employed in the three faculty composition reports created in support of Roadmap 1.0. These methodological changes are detailed in Appendix A. ${ }^{5}$

[^1]
## III. Faculty Diversity by Division and Department Faculty Composition: Fall 2021 Census

This report presents data about All Faculty (all JHU-paid employees who have faculty status) and Full-time Professorial Faculty, a subset of All Faculty. Data about All Faculty is organized by division, and data about full-time (FT) professorial faculty is organized by division ${ }^{6}$ and department. Table 1 details the full data for faculty representation by gender and race/ethnic identity broken out by division and rank. Table 2 details the representation by gender and race/ethnic identity of FT professorial faculty within departments. ${ }^{7}$

[^2]| Table 1: Fall 2021 All Faculty |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Composition of JHU Faculty by Gender

Across the university, $46.0 \%$ of all faculty and $41.8 \%$ of FT professorial faculty are women. The proportion of women varies substantially across divisions and also across departments within a division. Highlighting this variation, Charts 1 and 2 summarize the representation of all women faculty and FT professorial women faculty across JHU's divisions.

At the level of individual departments, 24 of 76 departments with at least 10 FT professorial faculty members exceeded the university's average with regard to representation of FT professorial women faculty members. Those 24 departments are listed in Table 3.

Table 3: Departments* with Percentage of Women FT Professorial Faculty That Exceeds the University's Overall Percentage (41.8\%), Fall 2021

| Division | Department | Total <br> Professorial <br> Faculty | \% Women |

|  | Mental Health | 24.7 | 62.8 |
|  | Population, Family and Reproductive Health | 22 | 77.3 |

* Includes only departments with at least 10 FT professorial faculty

## Representation of International Faculty

As shown in Tables 1 and 2, international faculty members are counted within their own category when assessing representation of disaggregated racial and ethnic identities. ${ }^{8}$ Since international faculty constitute a varied-and often substantial—number and proportion of faculty across departments and divisions, it is helpful to understand the spread in their representation across the university.

Across the university, $6.5 \%$ of all faculty and $3.6 \%$ of FT professorial faculty are international. Among 341 international faculty, $125(36.6 \%)$ are women, and $50(14.7 \%)$ identify as members of URGs. Among 124 International FT professorial faculty, 48 (38.7\%) are women, and 19 (15.3\%) identify as members of URGs.

Table 4a and 4b list the divisions whose proportions of international faculty and international FT professorial faculty are above the university averages.

[^3]Table 4a: Divisions with percent International faculty that exceeds the university average (6.5\%), Fall 2021

| Division | Total Faculty (N) | \% International |
| :--- | :---: | :---: |
| SAIS | 80.65 | $13.6 \%$ |
| Med Basic Sciences | 216.1 | $13.0 \%$ |
| Engineering | 329.2 | $10.0 \%$ |
| A\&S Natural Sciences | 261.95 | $9.9 \%$ |
| A\&S Social Sciences | 95.75 | $9.4 \%$ |
| Public Health | 778.75 | $8.9 \%$ |
| Business | 105.65 | $8.5 \%$ |

Table 4b: Divisions with percent FT Professorial International faculty that exceeds the university average (3.6\%), Fall 2021

| Division | FT Professorial <br> Faculty (N) | \% International |
| :--- | :---: | :---: |
| SAIS | 41.65 | $12.0 \%$ |
| Business | 88.65 | $10.2 \%$ |
| Engineering | 165.2 | $5.4 \%$ |
| A\&S Social Sciences | 66.75 | $4.5 \%$ |
| A\&S Humanities | 115.25 | $4.3 \%$ |
| Nursing | 75.85 | $4.0 \%$ |
| A\&S Natual Science | 136.95 | $3.7 \%$ |

## Composition of JHU Faculty by Race/Ethnic Identity

As with faculty composition by gender, the faculty composition by race/ethnic identity varies substantially among departments and divisions of the university.

Charts 3 and 4 summarize race/ethnic composition of all faculty and FT professorial faculty by division. In these charts and in all other analyses in this section, the category of URG includes all faculty, regardless of residency status, who identify with one or more of Hispanic/Latino, Black or African American, American Indian or Alaska Native, and/or Hawaiian or Other Pacific Islander. For a more detailed breakout of non-URG faculty demographics, see Charts B1 and B2 in Appendix B.

Chart 4: Fall 2021 Proportion from Under-represented Groups, FT Professorial Faculty

At the level of individual departments, 29 of the 76 departments with more than 10 FT professorial faculty members exceed the university's representation of FT professorial faculty from URGs. Those 29 departments are listed in Table 5. Nine of the 76 departments had no URG FT professorial faculty; those departments are listed in Table 6. Relative to the Fall 2019 report, this is an improvement from the eleven departments previously reported. Three departments now have URG professorial faculty: Cognitive Science, History of Art, and Biochemistry and Molecular Biology. Of concern, however, is that eight of the nine departments identified in Table 6 were also identified previously. Environmental Health and Engineering is a new addition.

Table 5: Departments* with Percentage of URG FT Professorial Faculty That Exceeds the University's Overall Percentage (10.6\%), Fall 2021

| Subdivision | Department | Total FT Professorial Faculty | \% URG |

## IV. Benchmarking Faculty Composition

The methodology used in this faculty composition report allows for benchmarking and comparison to groups of peer institutions. The primary source of benchmarking data is the Human Resources dataset in IPEDS. ${ }^{9}$ IPEDS data is only available at the university level (i.e., not broken out by divisions or departments).

In Table 7, using data from IPEDS, we compare JHU's FT professorial faculty composition, broken out by gender and race/ethnic identity, to the average composition among three reference groups: the Ivy Plus, ${ }^{10} \mathrm{AAU}$ private universities, and AAU public universities. In general, our professorial faculty composition is similar to that of the peer groups included here with a few exceptions. JHU's percentage of women faculty is a few points higher, Hispanic/Latino faculty is slightly lower, representation of Black or African American faculty is about a point higher, and representation of Asian faculty is about four points higher than among these peer groups.

For a more detailed comparison of faculty composition, see Appendix D, which presents box plots showing JHU's position in the distribution of percentage composition within the Ivy Plus, AAU Private, and AAU Public reference groups.

Table 7: Full-Time Professorial Faculty Composition (\%): JHU and Peer Group Averages Fall 2020/2021

|  | Women | Int'l | Hispanic / Latino | Black or African American | American Indian or Alaska Native | Asian | Native Hawaiian or Other Pacific Islander | White | Two or More Races | Unknown |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| JHU | 41.8 | 3.6 | 3.9 | 5.4 | O. 1 | 20.1 | O.O | 65.3 | 1.7 | 0.2 |
| Ivy Plus | 36.7 | 4.0 | 4.1 | 4.2 | 0.1 | 15.9 | 0.0 | 68.2 | 1.1 | 2.3 |
| AAU Private | 38.3 | 3.9 | 4.2 | 4.2 | 0.1 | 15.7 | 0.0 | 68.5 | 1.2 | 2.1 |
| AAU Public | 39.7 | 5.1 | 4.9 | 3.4 | 0.3 | 15.7 | 0.1 | 65.7 | 1.1 | 3.8 |

[^5][^6]
## V. Historical Trends

A composition report such as this one naturally raises the question about historical trends within JHU that could provide temporal context to the statistics presented here. Owing to the substantial methodology changes adopted in this first faculty report for Roadmap 2.0 (and described in Appendix A), we cannot accurately compare the composition of women and faculty from URGs within divisions and departments to that of past faculty censuses of fall 2015, 2017, and 2019. However, we can report on trends in representation of women and faculty from URGs at the level of whole university, as shown in Tables 8a and 8b.

| Table 8a: Proportion of Women Faculty, |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| JHU 2015-2021 |  |  |  |  |

| Table 8b: Proportion of Faculty in URGs, |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| JHU 2015-2021 |  |  |  |  |

Between fall 2015 and fall 2021, JHU's total faculty size grew from 4,663 to 5,219, an increase of $11.9 \%$, and its FT professorial faculty grew from 3,022 to 3,485 , an increase of $15.3 \%$. During this six-year period, each biannual census has marked an increase in the percentage of faculty who are women and the percentage of faculty who are from URGs. Between fall 2015 and fall 2021, the representation of women faculty has increased from $42.0 \%$ to $46.3 \%$, and that of FT professorial women faculty has grown from $37.4 \%$ to $41.7 \%$. In that same time frame, the percentage of URG faculty has increased from $8.0 \%$ to $11.2 \%$, and the percentage of URG FT professorial faculty has increased from $7.8 \%$ to $10.7 \%$.

How do the JHU trends depicted in Tables 8a and 8b compare with trends among our peers over a similar time period? Within the limitations of the format and granularity of the available datasets, we can provide the data snapshots shown in Tables 9a and 9b. Table 9a shows that representation of women among FT professorial faculty increased by 3 to 3.5 percentage points both at JHU and among these particular peer groups.

| Table 9a: Women FT Professorial Faculty, <br> Four Years Ago and Now (\%) |  |  |  |
| :---: | :---: | :---: | :---: |
|  | Fall 2016/2017 | Fall 2020/2021 | Change |
| JHU | 38.5 | 41.8 | 3.3 |
| Ivy Plus | 33.7 | 36.7 | 3.0 |
| AAU Private | 34.9 | 38.3 | 3.4 |
| AAU Public | 36.2 | 39.7 | 3.5 |

Note: JHU data as of Fall 2017 and Fall 2021; peer group data as of Fall 2016 and Fall 2020

| Table 9b: FT Professorial Faculty; Largest Race/Ethnicity Categories Four Years Ago and Now (\%) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| JHU | 3.9 | 3.6 | -0.3 | 3.2 | 3.9 | 0.7 | 4.3 | 5.4 | 1.1 | 18.4 | 20.1 | 1.7 | 69.2 | 65.3 | -3.9 |
| Ivy Plus | 4.0 | 4.0 | 0.0 | 3.4 | 4.1 | 0.7 | 3.8 | 4.2 | 0.4 | 14.2 | 15.9 | 1.7 | 71.7 | 68.2 | -3.5 |
| AAU Private | 3.7 | 3.9 | 0.2 | 3.5 | 4.2 | 0.7 | 3.8 | 4.2 | 0.4 | 14.4 | 15.7 | 1.3 | 72.1 | 68.5 | -3.6 |
| AAU Public | 5.2 | 5.1 | -0.1 | 4.4 | 4.9 | 0.5 | 3.1 | 3.4 | 0.3 | 14.1 | 15.7 | 1.6 | 69.2 | 65.7 | -3.5 |

Note: JHU data as of Fall 2017 and Fall 2021; peer group data as of Fall 2016 and Fall 2020

The data in Table 9b expands on the data snapshot of fall 2020-21 shown in Table 7 by also providing fall 2016-17 data regarding representation of the five largest race/ethnicity categories ${ }^{11}$ among FT professorial faculty. It shows that changes at JHU generally parallel the peer-group changes among International, Hispanic/Latino, Asian, and White categories. JHU's increase in the proportion of Black or African American FT professorial faculty over time, while small at 1.1 percentage points, is approximately 3 times the increase in proportion observed among the peer groups.

## VI. Moving Forward

Internal assessment of faculty composition helps JHU identify areas for improvement with regard to equitable representation of gender and underrepresented groups while also allowing JHU to track progress resulting from department and divisional policies/initiatives. Comparison to peer groups can help identify broader trends in the academic environment and point to more systemic issues within training field pipelines.

We are mindful that the Second Roadmap calls for a broadening of the composition reports. Some examples include collecting and presenting data to reflect the anonymous self-identification of

[^7]groups and identities (such as disability, religious, LGBTQ, or veteran/military status) in addition to other measures of diversity of background, experience, viewpoints, and thought via periodic climate surveys with data collection protocols evolving and tracking progress at the leadership and managerial levels. Future reports will incorporate the improved information landscape, the better to inform our efforts to measure our progress in faculty diversity.

It is encouraging that the trends over the last six years at JHU for both gender and URG representation have had positive slopes. Representation of women faculty has increased by 4.0 percentage points, while that of URG members has increased by 3.3 percentage points. Reflecting their diversity efforts, Nursing and Education schools have both recruited more men to the faculty. Over the last four years, changes in JHU's faculty composition with regard to gender and race/ethnicity have paralleled those of peer groups, indicating an overall increased representation of women and faculty from underrepresented backgrounds. In the case of representation of Black or African American FT professorial faculty, JHU's increase has slightly exceeded that of its peers.

In addition, we are committed to providing more granular and actionable benchmarking information to our divisions whenever possible. As we consider the best practices to foster supportive faculty environments and retain talent, it may be valuable to identify JHU departments that lead with regard to inclusive culture. We hope that with these additional emphases we can further improve on these numbers and surpass our peers. Our goal is to become a leader not only in our scholarly output but also in our reflection of our society.

## VII. Appendices

## Appendix A

Methodology Change for 2021 Faculty Composition Report

The categories and terminology described above for this report deviate from those employed in previous faculty composition reports (FCRs.) Motivated by interrelated needs of fair representation and accountability, this report incorporates several methodological changes for the analysis of the fall 2021 faculty census. These changes better align JHU's internal assessment of faculty composition with required federal reporting and improve our ability to benchmark against peers' diversity data.

During the span of JHU's Diversity Roadmap 1.0, three FCRs were published corresponding to the faculty censuses of November 2015, 2017, and 2019. In those reports the following data principles were incorporated:

- Each Bloomberg Distinguished Professor (BDP) and each faculty member in the joint divisional departments of Biomedical Engineering (BME) and Environmental Health and Engineering (EHE) was counted as a full headcount in each division where they held an appointment. However, these joint-appoint faculty members were unduplicated (i.e., only counted once) in divisional subtotals and university totals.
- Each faculty member was counted in one of six mutually exclusive race/ethnicity categories: Hispanic, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian or Pacific Islander, and White, regardless of legal residency status.
- Faculty who self-identified with two or more race/ethnicity categories were assigned to only one of the six categories based on a precedence rule which prioritized Hispanic identity over all racial identities. For non-Hispanic individuals, the rule prioritized the least represented groups over groups with the most representation.
- Two groups were created as aggregated measures of diversity. The 'Minority' group included all faculty members except those identified as only White. The 'Underrepresented Minority' (or URM) group included faculty members of all race/ethnicity categories except those who identified as only White; only Asian; or multiracial White and Asian.

The advent of Roadmap 2.0 presented an opportunity to revisit the design of the faculty composition report to better reflect its intended use by divisional and departmental leadership. In particular, this redesign facilitates benchmarking against peers' faculty diversity data. The following changes are incorporated in this Report of the Composition of the Faculty as of fall 2021:

- The joint appointments of BDPs are represented as fractional amounts per contract within the relevant departments. Additionally, BME and EHE faculty members are each counted only within their primary appointed department.
- As described above, each faculty member is counted in one of eight mutually exclusive categories: International, Hispanic/Latino, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian or Other Pacific Islander, White, and Two or More Races.
- We include a single aggregated measure of diversity, Underrepresented Groups (URG) to assess the representation of faculty members from race/ethnic identities that have been historically underrepresented within academic institutions. It is to be noted that the URM category in the old methodology matches the URG category of the new methodology.

As a result of these changes, departmental and divisional data in the fall 2021 report cannot be compared to data in the previous reports associated with the Diversity Roadmap 1.0. Overall, at the level of the whole university, trends in representation of women faculty and URM/URG faculty can be compared. In future years, more detailed longitudinal comparisons of divisional and departmental representation will be included in the faculty composition reports.

In past reports, we used the term "minority" to include all individuals encompassed under the term "underrepresented groups" and also Asian/Asian American faculty. The decision to narrow our focus in this report does not indicate a lack of appreciation for potential challenges of exclusion and discrimination that may be shared across these groups. For instance, we know that both Asian/Asian American faculty and faculty from URGs are underrepresented in academic leadership roles at Hopkins. However, with the focus in the Roadmap on improving in areas where we significantly lag in our numbers, we limit the scope of the term "URG" to reflect specificity and accuracy in naming groups that are underrepresented within our faculty body.

## Impact of Methodology Change

To illustrate the how these methodological changes impact assessments of faculty composition, the fall 2021 faculty census data was analyzed using both old and new data principles. Tables A1 and A2 summarize how the methodology change impacts the analysis of university total faculty composition by gender and race/ethnicity respectively. ${ }^{12}$

Using the new methodology, the total count of all faculty is $5,247.15$ compared to 5,248 with the old methodology. The fractional university total arises because there are faculty that have joint appointments in the Applied Physics Lab (APL) and those APL fractions are not included in this FCR.

While these methodological changes had a small impact on the total counts of all faculty and all women faculty, the percentage of representation of women faculty was not impacted by these methodology changes. Under both the old and new methodologies, in fall 2021, women represented $46.0 \%$ of all JHU faculty and $41.8 \%$ of FT professorial faculty, as shown in Table A1.

[^8]Table A1: Impact of Methodology Change on Analysis of Faculty Composition by Gender, Fall 2021 Data

In contrast to measures of gender representation among university faculty, the change in methodology did have a measurable impact on the assessment of racial composition of university total faculty. With the addition of two new categories, 413 faculty members were re-categorized as International or Two or More Races, as shown in Table A2 below.

By head count, the new methodology had the largest impact on the representation of Asian faculty members. Of the 1,283 faculty members identified as Asian in the old methodology, 244 (19.0\%) were moved into one of the two new categories. By percentage, the new methodology had the largest impact on the representation of Native Hawaiian and Other Pacific Islander faculty members. Of the 12 faculty members identified as 'Native Hawaiian and Other Pacific Islander' in the old methodology, 10 ( $83.3 \%$ ) were moved into one of the new identification categories, Tables A3a and A3b.

Table A3a: Effect of Methodology Change on Racial Composition - Fall 2021: All Faculty

|  | All Faculty |  |  |  |  |  |
| ---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Hispanic/ Latino | Black or African <br> American | American Indian <br> or Alaska Native | Asian | Native Hawaiian <br> or Other Pacific <br> Islander | White |
| Old Method (N) | 243 | 315 | 26 | 1283 | 12 | 3368 |
| New Method (N) | 213 | 281 | 17 | 1039 | 2 | 3281.15 |
| Recategorized (N) | 30 | 34 | 9 | 244 | 10 | 86.85 |
| Recategorized (\%) | $12.3 \%$ | $10.8 \%$ | $34.6 \%$ | $19.0 \%$ | $83.3 \%$ | $2.6 \%$ |

Table A3b: Effect of Methodology Change on Racial Composition - Fall 2021: Full-time Professorial Faculty

|  | Full-Time Professorial |  |  |  |  |  |
| ---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Hispanic/ Latino | Black or African <br> American | American Indian <br> or Alaska Native | Asian | Native Hawaiian <br> or Other Pacific <br> Islander | White |

Appendix B

## Detailed Faculty Race/Ethnicity Breakout

The demographic representation of non-URG faculty also varies between university divisions. Charts B1 and B2 illustrate this divisional variation by breaking out faculty composition by URG (inclusive of International faculty) non-URG International, Asian, and White faculty proportions.

Chart B2: Fall 2021 Race/Ethnicity Composition, Full-time Professorial Faculty

## Appendix C

## List of Public and Private AAU Universities

## Public AAUs

Georgia Institute of Technology-Main Campus
Indiana University-Bloomington
Michigan State University
Ohio State University-Main Campus
Pennsylvania State University-Main Campus
Purdue University-Main Campus
Rutgers University-New Brunswick
Stony Brook University
Texas A \& M University-College Station
The University of Texas at Austin
University at Buffalo
University of Arizona
University of California-Berkeley
University of California-Davis
University of California-Irvine
University of California-Los Angeles
University of California-San Diego
University of California-Santa Barbara
University of California-Santa Cruz
University of Colorado Boulder
University of Florida
University of Illinois Urbana-Champaign
University of Iowa
University of Kansas
University of Maryland-College Park
University of Michigan-Ann Arbor
University of Minnesota-Twin Cities
University of Missouri-Columbia
University of North Carolina at Chapel Hill
University of Oregon
University of Pittsburgh-Pittsburgh Campus
University of Utah **

University of Virginia-Main Campus
University of Washington-Seattle Campus
University of Wisconsin-Madison

## Private AAUs

Boston University
Brandeis University
Brown University
California Institute of Technology
Carnegie Mellon University
Case Western Reserve University
Columbia University in the City of New York
Cornell University
Dartmouth College
Duke University
Emory University
Harvard University
Johns Hopkins University
Massachusetts Institute of Technology
New York University

University of Southern California
Vanderbilt University
Washington University in St Louis
Yale University

[^9]Appendix D
Full-time Professorial Faculty Composition (\%): JHU and Peer Groups Fall 2021

The Ivy+Cohort is comprised of 13 institutions; the eight Ivy League Institutions (Brown, Columbia, Cornell, Dartmouth, Harvard, Penn, Princeton and Yale) in addition to Chicago, Duke, JHU, MIT and Stanford.

JHU Professorial Faculty Composition and AAU Private Peers, Fall 2021

[^10]

The AAU Public cohort is comprised of 35 institutions listed in Appendix C

[^0]:    ${ }^{1}$ See definition of Underrepresented Group, or URG, in the Report Nomenclature section below.
    ${ }^{2}$ More specific peer information is not included in this public-facing report.
    ${ }^{3}$ In the fall 2021 census, there are two faculty members whose gender identification is unspecified in the HR system. Based on their respective divisions, these two faculty members were assigned female within the census.

[^1]:    ${ }^{4}$ Hence, International faculty who identify in this way are included in their departments' and divisions' URG measures
    ${ }^{5}$ In previous reports for faculty data from 2015, 2017, and 2019 the term "underrepresented minorities" (URM) was used instead of URG but their definitions are exactly the same.

[^2]:    ${ }^{6}$ In this report, Arts and Sciences (AS) is shown as comprising three subdivisions: AS Humanities, AS Natural Sciences, and AS Social Sciences, and the School of Medicine comprises Basic Sciences, Clinical and Other Subdivisions; the term division is used to refer to divisions and/or subdivisions.

    7 The Carey Business School, School of Education, SAIS, School of Nursing, and Peabody do not have departments; in this report, depending on context, those divisions are also included in departmental-level analyses.

[^3]:    ${ }^{8}$ However, international faculty who additionally self-identify with an underrepresented race/ethnic identity are included in URG.

[^4]:    * Includes only departments with at least 10 FT professorial faculty

[^5]:    Note: JHU data as of Fall 2021; Peer group data is as of Fall 2020

[^6]:    ${ }^{9}$ IPEDS https://nces.ed.gov/ipeds/ is the Integrated Postsecondary Education Data System. It is a system of interrelated surveys conducted annually by the U.S. Department of Education's National Center for Education Statistics (NCES).
    ${ }^{10}$ For the purposes of this report, the Ivy Plus group comprises the eight Ivies (Brown, Columbia, Cornell, Dartmouth, Harvard,
    Penn, Princeton, and Yale) plus Chicago, Duke, JHU, MIT, and Stanford, for a total of 13 universities.

[^7]:    ${ }^{11}$ The other three race/ethnicity categories-American Indian or Alaska Native, Native Hawaiian or Other Pacific Islander and Two or More Races-total 1-1.5\% of the distribution in any group/year combination and are currently too small for reliable measures of change over the recent four-year period.

[^8]:    ${ }^{12}$ Comparisons to diversity metrics in past reports can only be made at the level of the full university since counts are unduplicated at university level in both methodologies. This unduplicated count feature is not available in the departmental or divisional counts in the old methodology and hence they cannot be compared with departmental and divisional counts under the new methodology.

[^9]:    ** does not submit faculty profile by CIP

[^10]:    The AAU Private cohort is comprised of 28 institutions listed in Appendix C
